

Mini Multo

Players 3 - 30

Materials

- 1 laminated Mini Multo board for each player
- 1 Dry erase marker for each player
- 1 Deca-die with numbers 0 - 9 (The 0 represents 10)

How to play

1. Teacher determines the factor that will be used for play.
2. Players write 9 of the first 10 multiples of that factor randomly on the game board. For example, if the teacher chooses 4 as the factor for play, then all players record 9 of the first 10 multiples of 4; randomly writing one multiple in each box and choosing one multiple to omit.
3. One player or teacher rolls the deca-die. Players determine the product and cross out that number on his or her game board. For example, if a 6 is rolled then players determine the product for 6×4 and then cross out the number 24 on their game board. If a player does not have a 24 then nothing is crossed out and play resumes with the next roll.
4. Play continues until a player has three squares in a row crossed out.

Mini Multo: ____

Fill the board with multiples of ____, up to ____
